Data Centers | Smart Buildings | Enterprise

## COMPANY PROFILE

2020

## WHAT WE DO

We design and manufacture **high quality, high performance** Physical Infrastructure Solutions and Services for Data Centers, Smart Buildings and Enterprise LANs

With our solutions, we can help you get the most out of your technology. We cover more than half of a data center's vital infrastructure. Whether you're adding more devices, increasing bandwidth, retrofitting, building a new facility, adding more demand to your network, or just optimizing your existing data center infrastructure, we have the right solution for your needs.

**We help you Stay Connected!**

# ABOUT US

## OUR COMPANY

Established in 2001 and based out of Miami, FL USA, we are positioned as a leading industry manufacturer of High Quality, Network Physical Infrastructure Solutions.

who  
**WE** are

WHAT TO EXPECT  
MHALIOEXBFCI

## VALUE PROPOSITION

Nitrotel is a complete line vendor that can bring value to its Business Partners by being able to supply all their Physical Infrastructure needs, all under one brand with a Lifetime Warranty.

# OUR SOLUTIONS

## Physical Infrastructure Solutions

We understand the importance of quality and performance of our products. That is why all our products are UL Certified, and our complete End-To-End solutions ETL Verified and Tested to assure our customers that the products they are using, not only meet but exceed the requirements specified in the ANSI/TIA and IEC standards that apply to Physical Infrastructure.

## Fiber Optic Solutions

We want to make sure that your network meets with today's high-data rate fiber-channel applications. We provide fiber optic systems that deliver high performance, flexibility, and reliability for basically every application.

## Data Center Solutions

Our DC solution offer Robust and Scalable Solutions to attend the most demanding Data Center environments. As your company grows, you require a partner that will support your evolution, and Nitrotel will be present every step of the way.

## FTTx Solutions

Our FTTx solutions are scalable and flexible providing both economic and technical benefits to all your gradual passive network implementation requirements.

If your copper-based local area network (LAN) is no longer keeping up with your company's technology improvements and upgrades, now could be the time to switch to GPON.

## Outside Plant Solutions

Our OSP Solutions can help you build a high-performing network quickly and cost effectively, with superior mechanical and optical performance, even in the harshest environments.
